

Mutual non-disclosure agreement

Signed evaluation copy

Issue date: 2026-04-16

Prepared by: Daniel Panea Lichtig

Synthetic business document generated for the Private Company Memory Demo. All companies, people, domains, and scenarios are fictional and any resemblance to a real engagement is unintended.

Parties and purpose

This mutual non-disclosure agreement is entered into between Daniel Panea Lichtig ("the Architect") and Brannfeld Industrial GmbH ("the Customer") for the purpose of evaluating a private company memory layer reference architecture and any related professional services engagement.

The agreement governs information exchanged between the parties from the effective date until two years after the last exchange, or until superseded by a signed services agreement that includes its own confidentiality terms.

Confidential information

Each party may disclose business, technical, operational, and commercial information related to the Brannfeld Industrial GmbH evaluation. This includes proposals, architecture documents, deployment diagrams, retrieval and evaluation results, financial estimates, pilot timelines, and any data the Customer chooses to share as part of the evaluation.

Confidential information excludes material already known to the receiving party at the time of disclosure, independently developed without reference to the disclosed information, publicly available without breach of this agreement, or lawfully received from another source without confidentiality obligations.

Marking is not required for information to be confidential, but parties should label particularly sensitive material so reviewers can apply the appropriate handling. Where the same information could reasonably be considered either business-sensitive or commercially neutral, the parties default to treating it as confidential.

Permitted use

The receiving party may use confidential information only to evaluate a potential pilot and related professional services, and may not use it for any other purpose, including product development unrelated to the evaluation, marketing, or competitive analysis.

Access must be limited to personnel and advisers who need the information for the evaluation and who are bound by comparable confidentiality obligations through employment, contract, or

professional duty. Each party is responsible for the acts and omissions of its personnel and advisers.

Neither party acquires any licence, ownership, or other right in the other party's intellectual property by virtue of disclosure under this agreement. Any rights to derivative work product produced during a pilot will be set out in a separate services agreement.

Data handling

No production customer data is required for the reference demo. Any later pilot will use a jointly approved data handling plan that specifies the categories of source artifacts, the retention period, the deletion process, and the named points of contact on each side.

Security documentation, deployment diagrams, retrieval logs, and audit evidence may be shared under this agreement. Where logs contain personal data, both parties agree to apply the minimum necessary disclosure and to redact identifiers that are not relevant to the evaluation.

If either party becomes aware of an actual or suspected unauthorised disclosure of confidential information, that party will notify the other without undue delay and cooperate in good faith on the remediation steps.

Term and signatures

This agreement takes effect on the date of last signature and remains in force for two years from the most recent exchange of confidential information unless extended in writing or superseded by a services agreement.

Signed for Daniel Panea Lichtig: Daniel Panea Lichtig, Principal Architect.

Signed for Brannfeld Industrial GmbH: Authorised business representative.
